

Hot Beverage & Frothing THERMOMETER

FEATURES

- ◆ The IR220-F will quickly and accurately measure the temperature of beverages and frothed milk. A computer-designed stainless steel clip will hold the thermometer stem snugly against any container. A positive lock, quick-release action, permits the thermometer stem to be adjusted to the desired height.
- ◆ When the clip is removed from the stem, this INSTA-READ® it can be used for all general purpose cooking needs.

Important: A polycarbonate lens is used for a watertight seal. It may be damaged if left in a hot oven. Clean thermometer stem before inserting it into food or beverage.

Note: To adjust the position of the clip, gently compress the bend of the clip as shown. Slide the clip up, or down, to the desired position. Please remember to clean the thermometer stem before inserting it into food.

Temperature sensor is between "dimple" and tip of stem. For best accuracy stem should be inserted into food to dimple or higher.

Loop holds thermometer stem.
